

Milligan holds info session

From Contributed Reports

MILLIGAN COLLEGE — The Admissions Office at Milligan College will host an information open house for its graduate and adult programs on Monday, June 27, from 6 to 7:30 p.m. in Derthick Hall.

Faculty and staff will be present to discuss degree completion programs for adults in business administration and early childhood education (BS), as well as graduate degree programs in business administration (MBA), education (MEd) and occupational therapy (MSOT). The open house will also include information about Milligan's online major in computer information systems.

The general information session will allow visitors to speak with faculty members and receive information on a variety of topics, such as academic coursework and financial aid.

The BS in business administration is a degree completion program that enables working adults to complete a business administration major in 16 months by attending class one night a week.

The BS in early childhood education allows adults who have completed about two years of college to complete the child and youth development major in about 18 months at either Milligan or at its offcampus site in Mountain City, Tenn. Teaching licensure in early childhood education (PreK-3) may be obtained by completing additional coursework and a 15-week supervised teaching experience in a public school setting.

The computer information systems-mobile major is designed for students who are unable to complete their degree or add a second major in a traditional college setting. Courses in this major are delivered to the student via Milligan's Internet course management system and can be easily accessed from anywhere. Students can take just one course at a time or complete the major in as few as four semesters.

The MBA is a 14-month program that meets one Saturday per month, complemented by ongoing Internet-based instruction. The program is designed to accommodate professionals working at every level of management and focuses on business leadership from a Christian perspective. Milligan offers its MBA in two locations — on the Milligan campus and at Walters State Community College's Morristown campus.

The MEd program includes both initial licensure and advanced degree options. The initial licensure degree is typically a 15-month professional educational program that allows students to earn their teaching certificate or license and their degree. The advanced program is for current teachers seeking professional development and their master's degree. Advanced MEd students have the option of completing their coursework completely online or in a traditional classroom setting.

The MSOT program is the only master's level occupational therapy program in northeast Tennessee. It prepares therapists to help people with injuries or illnesses to relearn basic living skills. The program is designed for people with undergraduate degrees in a variety of academic fields.
